2. Do we have to do electrical wiring for o each unit, if so how long is the closest D-Board from AC, Do u require to install one Sub D- Board(MCB,ELCB & CB for each unit) for the AC from the main wiring.

All electrical wirings are done. All Circuits and Circuit breakers installed and connected.

3. How many drain pipes, as per the drawing 6 AC were in a row, one AC was separate, Do u need 02 separate pipes, or the separate unit to connect the main 6 AC main pipe.

- Total 3 pipes, the 6 AC in which is a row should be connected to the existing (4") drain pipe through 2 separate drain pipes (2") that runs on ceiling.
- The 7<sup>th</sup> AC, (Separate AC) drain pipe should be connected to the existing drain pipe in roof. (Not the garden area).
- All pipe lines (Gas lines and Drain pipe-lines) are shown in the above drawings (drawings attached to question 1) for clear understandings. (However, the dimensions might not be very accurate.)
