- 1. What is the duration of the Consultancy? Is there a set duration or are the bidders to set a duration as per the work schedule?
 - A: Bidders are invited to suggest a project timeline, with a preference for a work duration not exceeding 6 months.
- 2. Do you expect Consultants to submit Hydrological assessments and modeling studies? A: Bidders have the flexibility to determine the consultancy methodology in alignment with the ToR. Technical Proposals will be scored, with a specific focus on the quality and depth of primary research and data collection methods proposed. Please refer to the evaluation criteria for further details.
- 3. Are there (i) land use maps, (ii)land use plans (iii) city development plans that will be made available to the consultants?
 - A: We are currently working with Urbanco to create the Land Use Plan of Kulhudhuffushi City as per the attached TOR. We will be able to provide you with updated drone images, the land use plan and topographic data once the ongoing consultancy is completed.
- 4. Are there terrain and / or contour maps of the Kulhudhuffushi City that will be made available to the consultants?
 - A: Terrain/ Contour maps for the City does not exist.
- 5. Does the "mappings" in the Key Deliverables item 6.2 refer to full physical mapping of the City that the consultants would need to undertake?
 - A: We do not require the full mapping completed at the inception report stage (if requested, we can provide our land use plan for reference at this stage) but are seeking detailed plans (process and timeline) to undertake under the mapping later on. We do require detailed and full mappings for the City as part of the Consultancy.

The mappings we seek but are not limited to the following:

- 1. Spatial plan (baseline map).
- 2. Vulnerability and risk and hazard map
- 3. Capacity map
- 4 Emergency routes and safe zone maps
